**Re: H.B. 525 Increase the Ohio Motion Picture Tax Credit**

Dear Representative [Insert Name Here]:

As an Ohio film vendor, I encourage you to vote "Yes" on H.B. 525 to increase the Ohio Motion Picture Tax Credit from \$40 million to \$100 million.

A recent study conducted by Cleveland State University done on behalf of the Greater Cleveland Film Commission has shown the incredible return on investment that the Ohio Motion Picture Tax Credit already provides for the State of Ohio. According to the study, since 2009, the State of Ohio has seen more than \$572 million in economic impact and created more than 4,162 full-time equivalent jobs thanks to media production.

As a local vendor, I have seen the positive effects of the Ohio Motion Picture Tax Credit firsthand and see the tremendous value that incentives like this play in creating economic impact for my business and others in my community. Without this incentive, and certainly without an increase in this incentive, there will not be the prospect of consistent production work, and Ohio vendors will lose out on the incredible economic opportunities that come with Ohio being the premiere destination for media production.

The passage of H.B. 525 would continue to create valuable economic impact not only for my business, but also for those looking to enter the media production field, like the students who will soon be graduating from Cleveland State University's School of Film & Media Arts.

Thank you for your consideration, and I again urge you to vote "Yes" on this bill. It is not just me as an industry vendor that takes interest, but many other local businesses and future filmmakers of Ohio who are counting on you to create economic impact and jobs should this law pass.

Sincerely,
